

## Interact Corrugate

A tiled based system with a linear corrugate texture.

Application	Walls and cabinetry
Available finishes	SuaveStone   Suave
Thickness	10 mm   5 mm on high points (includes 3 mm MDF panel)
Available Textures	Large Corrugate   Fine Corrugate
Max Panel Size	2400 x 550 mm
Min Radius for Curves	600 mm
Colour	Select from our SuaveStone and Suave colour libraries
Suitable substrates	Plywood   MDF
Substrate preparation	Secured and rigid Plywood   MDF to stud wall

**Interact Corrugate** : A decorative panel based system in a tile format. As this is not a 'seamless' installation, therefore consideration is required in the formatting of the tiles, the treatment of the join/negative detail and the finishing of the edges. Typically applied to a flat 3 mm MDF board in a max size of 2400 x 550 mm, the panels can be curved to create convex and concave profiles for joinery elements and specialised interior installations. When used as a feature for fire surrounds a NCS must be used. Due to the limitations of our finishes, the large corrugate profile is only available in our SuaveStone polished plaster system and the fine corrugate in our Suave corrugate plaster system.
